PLESA ALEXANDRU-FLORIN

SOC Analyst / Cybersecurity Analyst

Bucharest, Romania | +40754479583 | plesaalexandru1103@gmail.com | Blog | TryHackMe | LetsDefend | HackTheBox | Github | Linkedin

SUMMARY

Robotics graduate passionate about Blue Team Operations. Detail-oriented analyst with hands-on experience in phishing attacks, log analysis and incident investigations, leveraging SIEM platforms (Splunk), network packet inspection (Wireshark), and endpoint telemetry (Sysmon/Windows Event Logs) mapped to the MITRE ATT&CK framework.

EXPERIENCE

Penetration Testing Intern | SmartMedia, Remote JUL, 2018 – JUL, 2018

Collaborated with a cybersecurity specialist and conducted vulnerability assessments and web penetration testing. Successfully identified and exploited a critical Broken Access Control and Vertical Privilege Escalation vulnerability. It was just an non-contractual opportunity to see how real specialists work in the field.

- Utilized Burp Suite to intercept and manipulate HTTP requests during the password recovery flow.

- Bypassed authorization controls through parameter tampering to successfully escalate user privileges to 'Admin' level.

- Identified critical flaws in session management, highlighting the risks of missing secure cookie implementations.

PROJECTS

Defensive Security & SOC Investigation Labs (Portofolio)

Link | Tech Stack: Splunk, Wireshark, Sysmon, Windows Event Logs, MITRE ATT&CK

- Simulated and Investigated realistic attack scenarios within virtual lab environment (TryHackMe SOC L1, enterprise alert simulations), tracing attacker actions from initial access to exfiltration.
- Analyzed Windows event logs, Linux system telemetry, and network packet capture (PCAP) to identify command-and-control (C2), phishing attack, unauthorized privilege escalation.
- Authored in-depth technical write-ups detailing reproduction steps, indicators of compromise (IOCs), and remediation strategies mapped to the MITRE ATT&CK.

Blue team & Digital Forensics CTF Walkthroughs

Link | Tech Stack: Network Forensics, OSINT, Packet Inspection, Event Correlation

- Documented step-by-step methodologies and analysis for defensive challenges in competitive CTF events (e.g., Downtime CTF, Hackout CTF).
- Performed forensics artifact examination, network traffic inspection via Wireshark & Burp Suite and open-source intelligence (OSINT) gathering to uncover incident indicators and retrieve digital flags.
- Published structured walkthroughs breaking down detection logic, anomaly indicators, and tactical investigation workflows for the community.

SKILLS

SIEM basics (Splunk,ELK)	Log analysis	Alert Triage	Linux System Logs
Windows Event Logs	Phishing Analysis	Network Traffic Monitoring	Network Protocols
Wireshark	Burp Suite	Snort	TCPDump
GenAI	Machine Learning	Nmap	Metasploit

EDUCATION

Bachelor of Engineering in Robotics and Mechatronics | **POLYTECHNIC UNIVERSITY OF BUCHAREST**

OCT, 2022 – JUL, 2026

Focused on Artifical Intelligence algorithm, machine learning applications, and automation systems. Built a solid foundation in computer architecture, networking, and system telemetry, applying analytical and AI-driven methodologies in cybersecurity for anomaly detection, data pattern analysis and behavioral analysis.

COURSES

SOC L1 Learning path — OCT, 2026 – Present

TryHackMe

Cyber Security 101 Certificate — OCT, 2026 - OCT, 2026

TryHackMe

Introduction to Cybersecurity — SEP, 2026 – OCT, 2026

Cisco

Pre Security Certificate — JUL, 2026 – AUG, 2026

TryHackMe

SOC Fundamentals — JUN, 2026 – JUL, 2026
